

FACADE SYSTEM

Suitable with all types of PV modules.

Fixes into the wall, whether it's made from timber, steel or concrete.

Wind bracing is used at the bottom of the elevation frames to stabilise the system from lateral movement.

Elevation frames can be made to any specifications, including any angle from the wall and any distance from the wall.

Modules can also be installed flush to the wall without the need for any elevation frames.

2.93kg/m²

Weight

All types & thicknesses

Suitable facade types

1°-90°

Suitable module angle

Portrait & landscape

Module orientation

Aluminium & stainless steel
