

ROOF HOOK

Designed specifically to fit all types of roofing tiles and rafter widths, with smaller holes in the base plate to fit the small rafters.

The fixing holes are offset from each other so that the pressure of the system isn't focused in the same line to protect the rafter.

The Roof Hook is pre-assembled with a T Bolt that connects directly into the channels of our Mounting Rails.

The arm of the Roof Hook can be shifted to the left, right or centre for flexibility in reaching the rafter.

Height adjustability in the arm, allows the Roof Hook to be positioned correctly with most roofing tiles and rafters.

2.81kg/m²

Weight

All types

Suitable roofing tiles & sizes

10°-45°

Suitable roof pitch

Portrait & landscape
